Continuation of 5. does NOT place the application in condition for allowance because: applicants remarks are considered but not persuasive. Applicant remarks that Cox et al. cannot be reasonably interpreted as disclosing "inserting the first part of the watermark into the first media component and inserting the second part of the watermark into the second media component" or "extracting a first watermark part from the first media component and for extracting a second watermark part from a second media component" and that Cox et al discloses that subwatermarks are just being inserted into different datablock of the same image (page 2 paragraph 4 - page 3 paragraph 1 of remarks). Examiner agrees that Cox et al discloses subwatermarks being inserted into different datablock of the same image. Cox further discloses that the image can also be multimedia or video data (col 4 ln 21). Therefore, Cox does disclose inserting a first part of the watermark into a first component and inserting the second part of the watermark into the second component or extracting a first watermark part from a first component and a second watermark part of a second component. However, Cox is silent on such an embodiment involving multimedia data. However, Dittman discloses inserting watermarks into different media components (abstract). Therefore, the combination of Cox and Dittman disclose all the limitations as required by the claims.
